

Barrel Clamp

Barrel Clamp - Referred to as "Barrel Clamp", this hydraulic attachment is used on forklifts so as to compress objects which you would like to transport using the forklift. Normally, they're utilized so as to paper rolls, barrels, and handle kegs, together with several barrel clamp designs having the ability to revolve the cargo. Like for instance, the revolving function permits the one operating the forklift to be able to slot in a vertically stored paper into the horizontal intake of a printing press.
