

Work Platforms

Work Platform - Lift truck platforms add more versatility for individuals who should reach elevated heights with their forklift. These platforms would make it easier for employees to work safely and effectively at high levels. Lift truck platforms are an economical solution for businesses since they are a lot more cost effective compared to buying specialized machines. These platforms are also desirable since they could save plenty of storage space. To capitalize on the advantage and full potential of this machinery, you will have to find the lift which best suits the work projects you have in mind.

Platforms that slip onto lift truck forks are simple to install and lock into position. Slip-on style lift attachments have become more popular as they are quick and easy to function. They provide an inexpensive solution for businesses that do not require them on a regular basis. These platforms have a railing system in place, skid proof decking and tie offs accessible. They still require the use of safety machinery by staff but come with these specific features to be able to further the safety of people who will be utilizing them. Slip-on work platforms are an ideal option for those projects that take place in difficult spaces or over top of an object.

This type of platform lift could be secured using a pin after sliding the platform onto the blades. The industrial lift stand offers extra protection with a safety screen covering the rear and three rails. For extra safety, it is a better idea to consider choosing a style which opens through the front railing rather than the side gate unit.

Stock pickers can mount onto a lift truck with the same foundations as the other platforms though they are quite different. Stock pickers have a slighter base surrounded by railing on three sides and its protector partition is situated on the front. This particular unit differs from the other platforms in view of the fact that the surface and the cage do not take up the whole fork surface area.

Combination platforms have proven to be very useful whenever workers need to work with supplies a height. This particular kind of platform has a larger and smaller section. This design is vital so that employees can finish their task and not have to concern themselves about any supplies sliding onto them if the person operating it tips or tilts the objects.

There are many attachments available which could connect to your platform which would improve its efficiency even more. For bigger supply stuff such as piping, tall racks can be outfitted with guardrails. These racks keep supplies like brooms, pipes and various items from falling off of the platform and hitting other employees. For extra performance, there are toolboxes, trays and tools made to mount directly onto the side of the guardrails.
