

JLG Forklift Parts

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove set out on a cross country RV expedition. After spending numerous years establishing his family built crane company with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

During their journey, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a considerable marketplace for a product that could swiftly and securely elevate people in the air to accomplish maintenance and other construction functions.

After returning from their trip, John set up a business with two of his friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the business proudly continues to expand itself into numerous marketplaces worldwide and develops new products to ensure consumers are capable of being more effective and perform in the workplace within a safer environment.
